## Profile Summary

**Databricks Certified Data Engineer Associate and Azure Data Engineer with 1.5+ years of experience** building and optimizing scalable **ETL/ELT pipelines** and production-grade data engineering solutions on Azure. Hands-on expertise in **Azure Data Factory, Azure Databricks, PySpark, SQL, ADLS Gen2, Delta Lake, and Unity Catalog**, with experience in data ingestion, transformation, pipeline orchestration, **Medallion Architecture**, **data quality**, and **production support**. Currently expanding expertise in **Generative AI and AI-powered data solutions**.

## Technical Skills

**Programming & Query Languages:** Python, SQL, PySpark

**Azure Data Services:** Azure Data Factory (ADF), Azure Databricks, Azure Data Lake Storage Gen2 (ADLS Gen2), Azure Key Vault

**Databricks & Data Platforms:** Delta Lake, Unity Catalog, Delta Live Tables (DLT), Databricks SQL, Databricks Workflows

**Data Engineering:** ETL/ELT Pipelines, Data Ingestion, Medallion Architecture, Data Transformation, Data Quality, Performance Optimization

**Data Governance & Security:** Role-Based Access Control (RBAC), Data Lineage, Schema Management

**DevOps & Analytics:** Azure DevOps, Git, GitHub, CI/CD, Power BI, ServiceNow

## Work Experience

**Tata Consultancy Services (TCS)**

*Azure Data Engineer*

Feb 2025 – Present

Kolkata, India

**Data Ingestion & Pipeline Development**

Apr 2025 – Jan 2026

- \* Developed **ADF pipelines** to ingest data into **ADLS Gen2** using parameters, triggers, and dependencies.
- \* Built **PySpark and SQL transformations** in Databricks for data cleansing, standardization, and preparation.
- \* Worked with **Delta Lake** tables and schema management within the **Medallion Architecture**.
- \* Monitored pipeline executions and resolved ingestion and transformation issues in production environments.

**Advanced Data Engineering & Pipeline Modernization**

Feb 2026 – Present

- \* Developed and optimized **end-to-end ETL/ELT pipelines** using ADF, Databricks, PySpark, SQL, and ADLS Gen2.
- \* Developed **Databricks Lakeflow pipelines (formerly DLT)** to modernize legacy data workflows.
- \* Implemented **incremental processing, SCD Type 2, and Delta Lake optimizations** for scalable data processing.
- \* Designed **metadata-driven ADF orchestration** and resolved complex pipeline and data quality issues.

## Projects

**Modern Sales Data Lakehouse** | Azure Databricks, ADF, ADLS Gen2, PySpark, SQL, Delta Lake, Power BI

In Progress

- \* Designing an end-to-end **Medallion Lakehouse** on ADLS Gen2, ingesting SQL, REST API, and CSV/JSON data through **metadata-driven, parameterized ADF pipelines**.
- \* Implementing **watermark-based incremental ingestion** with audit and control tables to process new and modified records while maintaining pipeline traceability.
- \* Developing **PySpark and Delta Lake** transformations for schema enforcement, deduplication, data quality validation, and **SCD Type 2** processing.

## Education

**Hooghly Engineering and Technology College, MAKAUT**

*B.Tech in Computer Science and Engineering* | CGPA: 8.91

Aug 2020 – Aug 2024

## Certifications & Achievements

**Databricks Certified Data Engineer Associate**

**HackerRank SQL (Intermediate) Certificate**

Received **On-the-Spot Award** twice from **TCS management** for contributions and performance.
